Press Release

Wide Scanners and Systems to Distribute Touch Scan® Scanning and Printing Software Application

Wide Scanners and Systems, Inc. has teamed up with Aztek Inc. to offer a new approach to Wide Format Scanning and Printing

Rancho Cucamonga, CA, September 29, 2009: Wide Scanners and Systems, Inc. today announced that it will begin distributing Aztek's Touch Scan® Scanning and Printing integrated software application. Unlike traditional wide format scanning applications currently in use, Touch Scan takes wide format scanning to a new level.

Touch Scan touts an onboard wizard that guides users through a few simple steps, which quickly and easily lead to professional quality scanned reproductions. It's so easy to use, even the most novice user can produce professional quality scanned images in a matter of minutes. For the more experienced user, Touch Scan offers an advanced feature mode that allows users to fine tune their settings at any point during the scan process.

Touch Scan is designed to be used with a Touch Screen Monitor or Touch Screen PC running under the Multi-Touch version of Windows 7 or XP and Vista Operating Systems. Touch Scan is compatible with GTCO CalComp® ScanPlus™ 6 and ScanPlus 7 Series Wide Format Scanners.

Touch Scan's ease of use saves time and money by reducing expensive training costs. The on-screen audio/video help feature assists users at any time during the scan process with questions pertaining to the use of the software.

When combined with a GTCO CalComp ScanPlus Scanner, touch screen monitor, wide format printer and multi-function printer stand, Touch Scan is the perfect application to create an easy-to-use wide format scanning and copying system says Bill Mitchell, Vice President of Wide Scanners and Systems. Furthermore, he adds "the unique onboard wizard and superior image quality is what truly differentiates the application from other products on the market."

Touch Scan can be purchased through Wide Scanners and Systems' Authorized Resellers and is available separately or as a part of an integrated multi-function scanning and printing system.

Features/Benefits at a glance

- Built on proven technology (Aztek's Digital Photo Lab®) / Superior Image Quality
- Onboard Wizard / Minimizes learning curve and saves training cost
- Video Help Assistant / Provides 24/7 limited support - on demand
- Quickly save and recall scanning/printing session selections / time saving
- Fully customizable to fit your needs
